

REVE FIX

TILE FIXING ADHESIVE

Reve Fix is a polymer modified, cement-based, pre-packed and ready to use tile adhesive.

PRODUCT CHARACTERISTICS

PROPERTIES	SPECIFICATIONS
Appearance	Grey colour lump free powder
Open time	15 - 20 minutes
Tapped density	1.80 – 2.10
Pot Life	60 minutes

USES

Fixing all types tiles on internal and external walls/floors | Tiling applications in swimming pools.

BENEFITS

Ready to use, needs only mixing of water
| Excellent adhesion and slip resistance
| Excellent waterproofing | Crack free and low shrinkage | No need for presoaking of tiles and water curing | Suitable for both interior and exterior applications
| Better open time.

SHELF LIFE & STORAGE

Best before 12 months in an unopened, undamaged, originally sealed packing and if stored in dry conditions
| Protect from direct sunlight.

RECOMMENDED DOSAGE

300 ml water per kg of Reve Fix powder.

COVERAGE

4 sq.ft / kg for 3 mm thickness.

DIRECTIONS OF USE

The surface to be tiled must be clean and dry
| Existing tiles should be clean and securely fixed | Add 1 kg of Reve Fix powder to 300 ml potable water | Mix thoroughly until a smooth creamy consistency is obtained
| Allow the mixture to stand for 10 minutes
| Mix again and start applying with a trowel
| Apply a thin bed of 3 mm thickness by a trowel. Comb the surface gently and start placing tiles before the adhesive begins to surface dry | While fixing the tiles into the adhesive apply slight pressure to ensure good adhesion.

NOTE

Do not apply directly on damp surfaces
| Do not use to fix heavy tiles or stones, marble, granite, etc on vertical areas
| Grouting should not be done for at least 24 hours.

HEALTH & SAFETY PRECAUTIONS

Use rubber hand gloves & safety goggles
| In case of contact with skin, wash with plenty of water
| Keep out of reach of children.

CLEANING OF TOOLS

Clean all tools and application equipments with water immediately after use.
| Cured material can be removed mechanically.
